Site Classification	<u>S</u> <u>PS</u> <u>U</u>

This improvement permit shall become invalid immediately if any changes are made on the site.
For example: 1) Increasing the size of the home or number of bedrooms. 2) Relocation of house site or altering size or location of the lot. 3) Grading, cutting or filling the area designed for the sewage system and the 100% repair area or the location of a driveway, utilities, etc. on these areas. 4) The placement of or discovery of an existing well which is too close to the sewage system and 100% repair area, as required by state law. 5) Anything else which occurs that would cause the permit to become void as stated in Article 11, Chapter 130A of the General Statutes of North Carolina, otherwise the permit shall be valid for sixty (60) months from date of issue.

I have read and fully understand the above.

*Note: GS 130A-335(b) GS 130A-335(f) The following shall apply to this application and the improvement permit authorization for waste water construction if one is issued. The improvement permit/authorization for waste water construction shall become invalid immediately if any changes are made on the site. For example: 1) Increasing the size of the home or number of bedrooms. 2) Relocation of house site or altering size or location of the lot. 3) Grading, cutting or filling the area designed for the sewage system and the 100% repair area or the location of a driveway, utilities, mulch beds, gardens, low areas, gutter lines, etc. on these areas. After the septic tank system has been installed, landscaping should be done in such a way as to direct the movement of water, surface and/or internal water, away from the septic tank system and designated repair area. 4) The placement of or discovery of an existing well which is too close to the sewage system and 100% repair area, as required by state law. 5) Anything else which occurs that would cause the permit to become void as stated in Article 11 Chapter 130A of the General Statutes of North Carolina. The authorization for waste water construction shall be issued only after a preconstruction conference and is also subject to the above conditions. Otherwise the permit shall be valid for sixty (60) months from date of issue.

I have read and fully understand the above.
