

This property offers the ideal blend of city amenities and country living. The home on a 1.02-acre lot has been well cared for and greatly enhanced. Carefully crafted interiors, surrounded by a regenerative forest and native-plant landscape, make this home quintessentially Driftless!

Enjoy the chef's kitchen, which is filled with natural light and is amazing. The stainless-steel appliances include a Wolf 48" gas range with two ovens separated by a French cooktop. Maple cabinets and solid surface countertops accent the space beautifully. A Jotel Wood stove in the living room provides the warm coziness that makes fall and winter days memorable. A main-level den is perfect for an office or an extra guest bedroom. The primary bedroom and two spacious bedrooms are on the second floor, plus an extra bonus room with south-facing windows is ready for a studio or yoga space. Each floor has a full bathroom. There is tile and hardwood flooring throughout. Quality building materials and workmanship are evident. And a walk-up attic provides lots of storage options.

Work from home? The fiber optic internet is fast. It reaches a screened-in forest deck that also has electricity. The upgraded electric sauna can be enjoyed year-round and takes only 30 minutes to heat up. The Designer SL2 Sauna + Sauna Logic 2 Controller has an automatic shutoff & is Bluetooth- and WiFi-capable. The 65' x 12' Moonlight Granite section of driveway leads to the two-car garage and has two EV chargers.

The extensive landscaping, with many native plantings, is bordered by locally sourced stone. The three-year forest regeneration project, under the professional guidance of Trillium Consulting, included the partial removal of invasive species and dead and diseased trees. It draws birds, foxes and deer. Now the mix of white oak, red oak, bur oak, shagbark hickory, sugar maple, basswood, black cherry, and walnut trees flourish, and sunlight reaches the forest floor, supporting natural regeneration and native species plant growth.

The home security system, complete with water sensors, is included in the sale. The sellers are willing to sell much of the furnishings. If you are looking for Driftless, you have found it. Welcome home!
