Dear Valued Customer,

Happy 2026 to everyone!! Hope this letter finds you well. Spring is fast approaching, which means generator services are as well. 2026 brings a price increase to our annual service rate. We would like the opportunity to continue to provide you with the peace of mind that you get with the Annual Generac Generator Service.

We provide over 1,300 Annual Generac Generator services from March through December, and more are being added year after year. We will not be starting generator services until March, (weather permitting) even if your service was completed in previous years in January or February or unit was installed during those months, our scheduled time to start services is March.

As always, we strive to keep up the latest training provided by Generac to be able to keep our techs "in the know" with firmware updates and other issues that arise over the course of the years. Your Generac Generator service is important to us, as much as it is to you!

We hope that you will continue to take advantage of our Annual Generac Generator Service Program and look forward to serving you in the future!
