Discover Norwood Lake: A Man-Made Wonder

Norwood Lake is a special kind of lake called a reservoir. This means it was created by people, usually by building a dam across a river. In this case, the lake was formed from the [Raquette River](#). Water flows into the lake from the Raquette River and also flows out back into the same river.

The lake covers an area of about 352 acres. That's like 266 football fields! It's not super deep, with an average depth of 8 feet. However, some parts can be as deep as 25 feet. The shoreline stretches for about 3 miles, offering plenty of space to explore.

Fish and Wildlife in Norwood Lake

Norwood Lake is home to many different types of fish. If you enjoy fishing, you might catch some exciting species here.

- **Smallmouth Bass:** These fish are known for being strong fighters. They are a popular catch for many anglers.
- **Northern Pike:** Pike are long, slender fish with sharp teeth. They are often called "water wolves" because they are top predators.
- **Rock Bass:** These smaller fish are fun to catch, especially for beginners. They often hide around rocks and logs.
- **Yellow Perch:** Yellow perch are easily recognized by their stripes. They are common and tasty fish.
- **Walleye:** Walleye are prized for their delicious meat. They are often found in deeper parts of the lake.

Besides fish, you might see other wildlife around the lake. Birds, ducks, and other animals often visit the water's edge.

Fun Activities at Norwood Lake

Norwood Lake is a great place for outdoor activities. One popular activity is boating. There is a special place called a "carry down boat launch" on Riverside Road. This means you can bring your small boat or kayak and launch it into the water.

Boating is a wonderful way to explore the lake. You can paddle around and enjoy the peaceful scenery. Fishing from a boat can also be a lot of fun. Remember to always wear a life jacket when you are on the water!
