275. **M. RADON DISCLOSURE:** (The following Seller disclosure satisfies MN Statute 144.496.)

276. **RADON WARNING STATEMENT:** The Minnesota Department of Health strongly recommends that ALL
277. homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends
278. having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can
279. easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

280. Every buyer of any interest in residential real property is notified that the property may present exposure to
281. dangerous levels of indoor radon gas that may place occupants at risk of developing radon-induced lung cancer.
282. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading
283. cause overall. The seller of any interest in residential real property is required to provide the buyer with any
284. information on radon test results of the dwelling.

289. pertaining to radon concentrations in the Property, is liable to the Buyer. A buyer who is injured by a violation of MN
290. Statute 144.496 may bring a civil action and recover damages and receive other equitable relief as determined by
291. the court. Any such action must be commenced within two years after the date on which the buyer closed the

324. **O. WATER INTRUSION AND MOLD GROWTH:** Studies have shown that various forms of water intrusion affect
 325. many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
 326. leaving the home.

327. Examples of exterior moisture sources may be:

- 328. • improper flashing around windows and doors,
- 329. • improper grading,
- 330. • flooding,
- 331. • roof leaks.

332. Examples of interior moisture sources may be:

- 333. • plumbing leaks,
- 334. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 335. • overflow from tubs, sinks, or toilets,
- 336. • firewood stored indoors,
- 337. • humidifier use,
- 338. • inadequate venting of kitchen and bath humidity,
- 339. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 340. • line-drying laundry indoors,
- 341. • houseplants—watering them can generate large amounts of moisture.

342. In addition to the possible structural damage water intrusion may do to the Property, water intrusion may also result
 343. in the growth of mold, mildew, and other fungi. Mold growth may also cause structural damage to the Property.
 344. Therefore, it is very important to detect and remediate water intrusion problems.

345. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to
 346. humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious
 347. health problems, particularly in some immunocompromised individuals and people who have asthma or allergies
 348. to mold.

349. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
 350. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the
 351. Property inspected for moisture problems before entering into a purchase agreement or as a condition of your
 352. purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the
 353. Property.

354. **P. NOTICE REGARDING PREDATORY OFFENDER INFORMATION:** Information regarding the predatory
 355. offender registry and persons registered with the predatory offender registry under MN Statue 243.166

 357. is located or the Minnesota Department of Corrections at (651) 361-7200, or from the Department of

 - 405. believes has the expertise necessary to meet the industry standards of practice for the type of inspection
