FOOD TREES

APPLES

REDLOVE ODYSSO APPLE (bloom group 4)
- planted spring 2023
- 1 gallon potted Raintree Nursery
- Hardy to zone 4
- Dwarf 11-12’
- excellent disease resistance to scab
- early bloomer category 1
- ripe October
- red flesh, very sweet
- dark pink blooms

LIBERTY APPLE (bloom group 3)
- planted spring 2022
- one tree on east end of southern most orchard row, one tree in middle of espalier
- bareroot from Raintree Nursery
- dwarf, 11’
- most disease-resistant apple on planet
- dark red skin, intense flavor, medium size fruit
- high scab and mildew resistance
- ripe early October
- zone 4-9

COSMIC CRISP APPLE (bloom group 4)
- planted spring 2021
- bareroot from Raintree Nursery
- dwarf, 11’
- new apple from WSU
- red with with lenitcels that look like stars, thus name Cosmic Crisp
- only permitted to be grown in WA state
- large, crisp, great productivity
- scab resistant
- cross between Honeycrisp & Enterprise
- blooms mid-late season
- ripe September
- Zone 5-9

GALA APPLE (bloom group 3)
- planted spring 2021
- potted from Wal-mart
- fairly tall when planted with baby apples already on tree
- great, all purpose apple
- ripe early October
- years to bear: 2-5
- zone 5-8

LUCY GEM (bloom group 3)
- planted spring 2024
- bareroot, Pretty Edibles
- yellow skin with red blush, striking pink flesh
- juicy, crispy, complex berry flavors
- semi-dwarf

GRANNY SMITH (bloom group 3)

- planted “supreme” bareroot spring 2024
- Stark Bros
- semi-dwarf
- perfect for baking and cider
- ripe late October

ENTERPRISE (bloom group 4)

on east and west end of espalier

CRABAPPLE

DOLGO CRABAPPLE (bloom group 3)

- planted spring 2022
- bareroot from Raintree Nursery
- dwarf, 11’
- best all-purpose crabapple
- 1” tart, crimson fruit, eat raw or make into ruby-red apple jelly
- fruit is so bright and abundant it looks like a decorated Christmas tree
- scab, mildew resistant
- has a cascade of white flowers in spring
- tastes like candied cranberries when eaten fresh
- zone 4-9
- ripe early
- years to bear: 2-5
- planted on northwest corner of house

CENTENNIAL CRABAPPLE (bloom group 3)

- planted spring 2022
- bareroot from Raintree Nursery
- semidwarf, 8’
- heavy crops of small, sweet, oval fruit
- bright orange-red fruit, white flesh
- ripe early
- fantastic pollinator for apple trees
- great ornamental value with red buds that open into snow white flowers
- zone 3-9
- years to bear: 2-5
- planted on northwest corner of playhouse by playground

PERSIMMON

PRAIRIE GEM

In orchard

Prairie Dawn

By greenhouse

ALMOND

PRIMAVERA ALMOND

- planted potted spring 2023, Pretty Edibles (pre-sweated)
- very late blooming
- earliest ripening
- sweet nuts
- partially self-fertile, produces more if planted near other almond variety or peach
- hardy to zone 5

- typically not bothered by pests
- yields 20+ lbs
- bears 2-3 years after planting
- on Lovell Peach rootstock
- 10-15’ tall & wide
- blooms April
- Ripe September
- fragrant, pink blossoms

NIKITA’S PRIDE ALMOND
- planted potted spring 2023, Pretty Edibles (pre-sweated)
- very late blooming
- large, high quality nuts
- partially self-fertile, produces more if planted near other almond variety or peach
- hardy to zone 5
- typically not bothered by pests
- yields 20+ lbs
- bears 2-3 years after planting
- on Lovell Peach rootstock
- 10-15’ tall & wide
- blooms April
- Ripe September
- fragrant, pink blossoms

EUROPEAN PEAR

BARTLET EUROPEAN PEAR
- planted bareroot spring 2020
- Lowes
- green fruit ripens to yellow
- years to produce: 4-6
- fast growing tree
- zone 5-8
- ripe late August
- early bloomer

ANJOU EUROPEAN PEAR
- planted bareroot spring 2020
- Lowes
- keeps up to 7 months
- large, green fruit ripens with some yellow
- ripe late September
- zone 5-8
- years to bear: 4-6
- later bloomer

UBILEEN
- planted bareroot spring 2024
- Pretty Edibles
- ripe late July/early August
- very disease resistant
- yellow skin with red blush
- early bloomer
- zone 5-9

ASIAN PEAR

KIKISUI ASIAN PEAR
- planted spring 2021
- bareroot from Raintree Nursery
- reliably bares large fruit
- fruit is round, yellow, sweet, juicy
- fireblight resistant
- tree bears young
- Zone 5-9
- ripe September
- semi-dwarf, 15’

STARKING GIANT ASIAN PEAR
- planted spring 2021
- bareroot from Stark Bros
- easy to grow
- each fruit is 12-15 oz, stores up to 9 months with proper refrigeration
- resistant to pear leaf spot
- ripe October
- zone 4-8
- years to bear: 4-6

NECTARINE

HARDIRED NECTARINE
- planted spring 2022
- bareroot from Raintree Nursery
- ripe August
- semidwarf, 12’
- large showy pink flowers
- bears large quantities of red, sweet, tasty, yellow-fleshed fruit
- years to bear: 2-4

NECTARINE 2

PACIFIC PRIDE
- potted, spring 2024
- Pretty Edibles
- white fleshed
- abundant, large fruit
- self-fertile
- resistant to peach leaf curl

EUROPEAN PLUM

GREEN GAGE (EUROPEAN) PLUM
- zone 5-7
- planted bareroot from Lowes, spring 2020
- fragrant, spring blooms
- ripe mid-late summer
- fruit is small/medium, freestone, green, very sweet

ITALIAN (EUROPEAN) PLUM
- reliable, heavy producer
- bareroot from Lowes, planted spring 2020

- large, purple freestone fruit, yellow flesh
- hardy tree
- 12’
- zone 5-9

YELLOW EGG PLUM

ASIAN PLUM

EARLY GOLDEN ASIAN PLUM
- zone 5-9
- 12’
- ripens July (often earliest of all fruit in orchard)
- medium sized yellow plums with red blush
- freestone, meaty
- *must thin* to prevent biennial fruiting
- needs another Asian plum for pollination
- bareroot spring 2024, Raintree Nursery

BUBBLEGUM PLUM (TOKA)
- planted bareroot Spring 2021
- zone 3-9
- semidwarf, 14’
- excellent pollinator
- abundant white blossoms in spring
- very productive
- red fall foliage
- ripe mid-late summer

SWEET CHERRY

KRISTEN CHERRY
- planted spring 2021
- bareroot from Raintree Nursery
- world’s hardiest sweet cherry – surviving winters in windswept Norway & Montana
- crack resistant
- ripe July-August
- dwarf, 11’
- years to bear: 4-7
- needs Rainier for pollination

SWEETHEART CHERRY
- planted spring 2022
- potted from Wal-mart
- 10-15’ tall, 8-10’ wide
- Hardy to zone 5
- Late summer ripening
- Self-pollinating
- Planted on north side of property in currant bed, near horseradish
- Resists cracking in summer rain

RAINIER CHERRY
- Zone 5-9
- planted spring 2023
- Pretty Edibles

- needs Kristen for pollination
- ripens July

SOUR CHERRY

EXISTING SOUR CHERRY SHRUB (Early Richmond?)

NORTHSTAR PIE CHERRY
- Zone 4-8
- planted spring 2023, planted to west of support for power pole/east of old plum tree
- Pretty Edibles
- self-fertile
- max height 10’, 8’ spread
- produces 50+ lbs fruit
- red fruit/red flesh

CARMINE JEWEL
- bareroot spring 2024
- Pretty Edibles
- purple-red skin, dark red flesh
- sweet-tart, good for processing or eating fresh
- 6-7’, tends to be shrubby
- produces 20-30 lbs
- partially self-fertile
- very cold hardy

MONTMORENCY
- planted “supreme” bareroot spring 2024
- Stark Bros
- semi-dwarf 12 -15’
- most common pie cherry
- red skin, yellow flesh

PEACH

PEACH 1
- planted spring 2020
- bareroot from Lowes
- years to bear: 2-4

PEACH 2
- planted spring 2020
- bareroot from Lowes
- years to bear: 2-4

FROST
- bareroot planted spring 2024
- Pretty Edibles
- abundant crops
- disease resistant
- late blooming
- self-fertile
- hardy to zone 5

SALISH SUMMER

two to north of pond

APRICOT

HARCOT APRICOT
- hardy to zone 4
- self-fertile
- planted bare root spring 2023, Pretty Edibles
- late bloom protects from spring frost
- 10-12’ tall
- produces 2-3 years after planting
- produces 50+ lbs fruit
- freestone, sweet & juicy
- very resistant to brown rot and perennial canker

HARGLOW APRICOT
- Late blooming, early ripening
- medium to large fruit with red blush
- firm, sweet, flavorful
- some resistance to brown rot & bacterial canker
- hardy to zone 5
- compact tree
- self-fertile
- planted bare root spring 2023, Pretty Edibles

SCOUT APRICOT
- bareroot spring 2024, Pretty Edibles
- hardy to zone 3
- reliable
- tasty golden fruit
- brilliant display of pink flowers
- partially self-fertile

PLUM CROSSES

NADIA CHERRY PLUM
- planted spring 2020
- potted from Blue Moon Garden & Nursery, Spokane
- 2 trees
- semidwarf, 12’
- cherry-plum cross
- zone 5-9
- ripe August

TRI-LITE PEACH-PLUM
- planted spring 2022
- bareroot from Raintree Nursery
- semidwarf, 14’
- zone 5-9
- ¾ peach, ¼ Asian plum
- fruit has yellow background with rose/orange/amber blushing
- flesh is firm, white, juicy, clingstone with yellow striping
- tastes like white peach with plum aftertaste
- medium sized fruit with light fuzz
- ripens early
- showy pink flowers, mid to late blooming

DAPPLE DANDY PLUOT

- planted spring 2021
- bareroot from Raintree Nursery
- semidwarf, 12’
- freestone
- pluot: plum-apricot, frequent taste-test winner
- AKA Dinosaur Egg plum
- yellow-green skin turns dappled maroon-yellow, red-white flesh
- make sure to thin so it doesn’t overset & become biennial
- Zone 5-9
- Ripe July

QUINCE

AROMATNAYA RUSSIAN QUINCE

- planted spring 2022
- bareroot from Raintree Nursery
- pineapple-like flavor sweet enough to eat fresh, non-astringent
- disease resistant
- round, yellow fruit
- ripe October, store in window until starts to soften
- uncooked texture is dense, but nice thinly sliced or for cooking
- showy big, white blossoms in late spring
- zone 5-9
- semidwarf, 11’
- years to bear: 5
- planted on path to chicken coop (west side)

KYZYL KURGANSKAYA QUINCE

- planted spring 2022
- bareroot from Raintree Nursery
- sweet enough to be eaten fresh, non-astringent
- medium sized, pear-shaped fruit
- zone 5-9
- semidwarf, 11’
- planted on path to chicken coop (east side)
- ripe early fall
- years to bear: 5

PINEAPPLE

- bareroot 2024
- Pretty Edibles
- smooth, golden yellow fruit with white flesh, apple shaped
- slight pineapple flavor
- some like to eat it fresh
- self-fertile
- planted in flower bed near drinking fountain

FIG

BROWN TURKEY FIG

- planted potted spring 2023, Wal-mart
- large fig, mahogany with light amber, very sweet flesh
- bears heavily, can bear 2x per year
- zone 7-10, bring indoors to unheated space when frost threatens
- good for containers

DESERT KING

NEGRONNE (VIOLETTE DE BORDEAUX)

NEVERELLA

LATTARULA

HARDY CHICAGO

VERN’S BROWN TURKEY

MARSEILLES

CORNUS MAS

RED STAR CORNUS MAS
- planted bare root spring 2022
- Raintree Nursery
- Zone 4-9
- Ripe September
- Heavy producer of 1 ¼” pungent, delicious, dark red, oval fruit
- 10-15’
- Gorgeous yellow late winter/early spring flowers
- planted near driveway on north side

YELLOW FRUITED CORNUS MAS
- planted bare root spring 2022
- Raintree Nursery
- Zone 4-9
- Ripe October
- Yellow, oval 1” fruit, tastes like pie cherry (more delicate and fragrant than red cornus mas fruit), ripe in fall
- 10-15’
- planted near driveway on north side
- Gorgeous yellow late winter/early spring flowers

SVITLANA CORNUS MAS
- Located on north side of greenhouse

JUJUBE

LI JUJUBE
- zone 5 and up
- 8-10’ tall
- bears fruit 2-3 years after planting
- 30+ lbs fruit
- blooms mid-summer
- ripens October
- eat fresh, dried, or candied
- can withstand some drought
- not bothered by pests or disease
- planted spring 2023, potted, Pretty Edibles

- fruit size & shape of small egg, mahogany colored
- sweet, crisp, flavorful, almost imperceptible seedless
- needs Coco to pollinate
- located between west grape trellis and Ts, jujube on S

COCO JUJUBE
- zone 5 and up
- 8-10’ tall
- bears fruit 2-3 years after planting
- 30+ lbs fruit
- blooms mid-summer
- ripens October
- eat fresh, dried, or candied
- can withstand some drought
- not bothered by pests or disease
- planted spring 2023, potted, Pretty Edibles
- round, golden brown fruit
- coconut-like flavor
- needs Li to pollinate
- located between west grape trellis and Ts, jujube on N

AUTUMN BEAUTY
- one of best tasting jujube with spiced apple flavor
- planted spring 2024, potted
- Pretty Edibles
- ripens early
- plant stays smaller than others
- needs pollinator

PAW PAW

SHENANDOAH?
- planted Spring 2024
- potted gallon pot, Pretty Edibles
- one of the largest and most flavorful
- creamy yellow custard-like flesh

BENSON?
- planted Spring 2024
- potted 5.5” pot, Pretty Edibles
- superior, very productive
- early ripening
- round fruit
- flavors of mango, pineapple, banana

KSU- Benson
on north end of raised beds on town side

KSU – Chappell
on north end of raised beds on town side

Shenandoah
on north end of raised beds on town side

Allegheny
on north end of raised beds on town side

HAZELNUT/FILBERT

THETA

- located by stairs down to road
- planted potted spring 2023, Pretty Edibles
- complete immunity to EFB
- excellent pollinator
- produces good quality, medium sized, flavorful nuts
- cross pollinates with Jefferson
- grows 10-15 ft
- hardy to zone 4, flowers can be damaged at -15
- early fall through winter interest with catkins and flowers
- nuts ripe in September, gather from ground
- bears 2-3 years after planting
- produces 10+ lbs at maturity

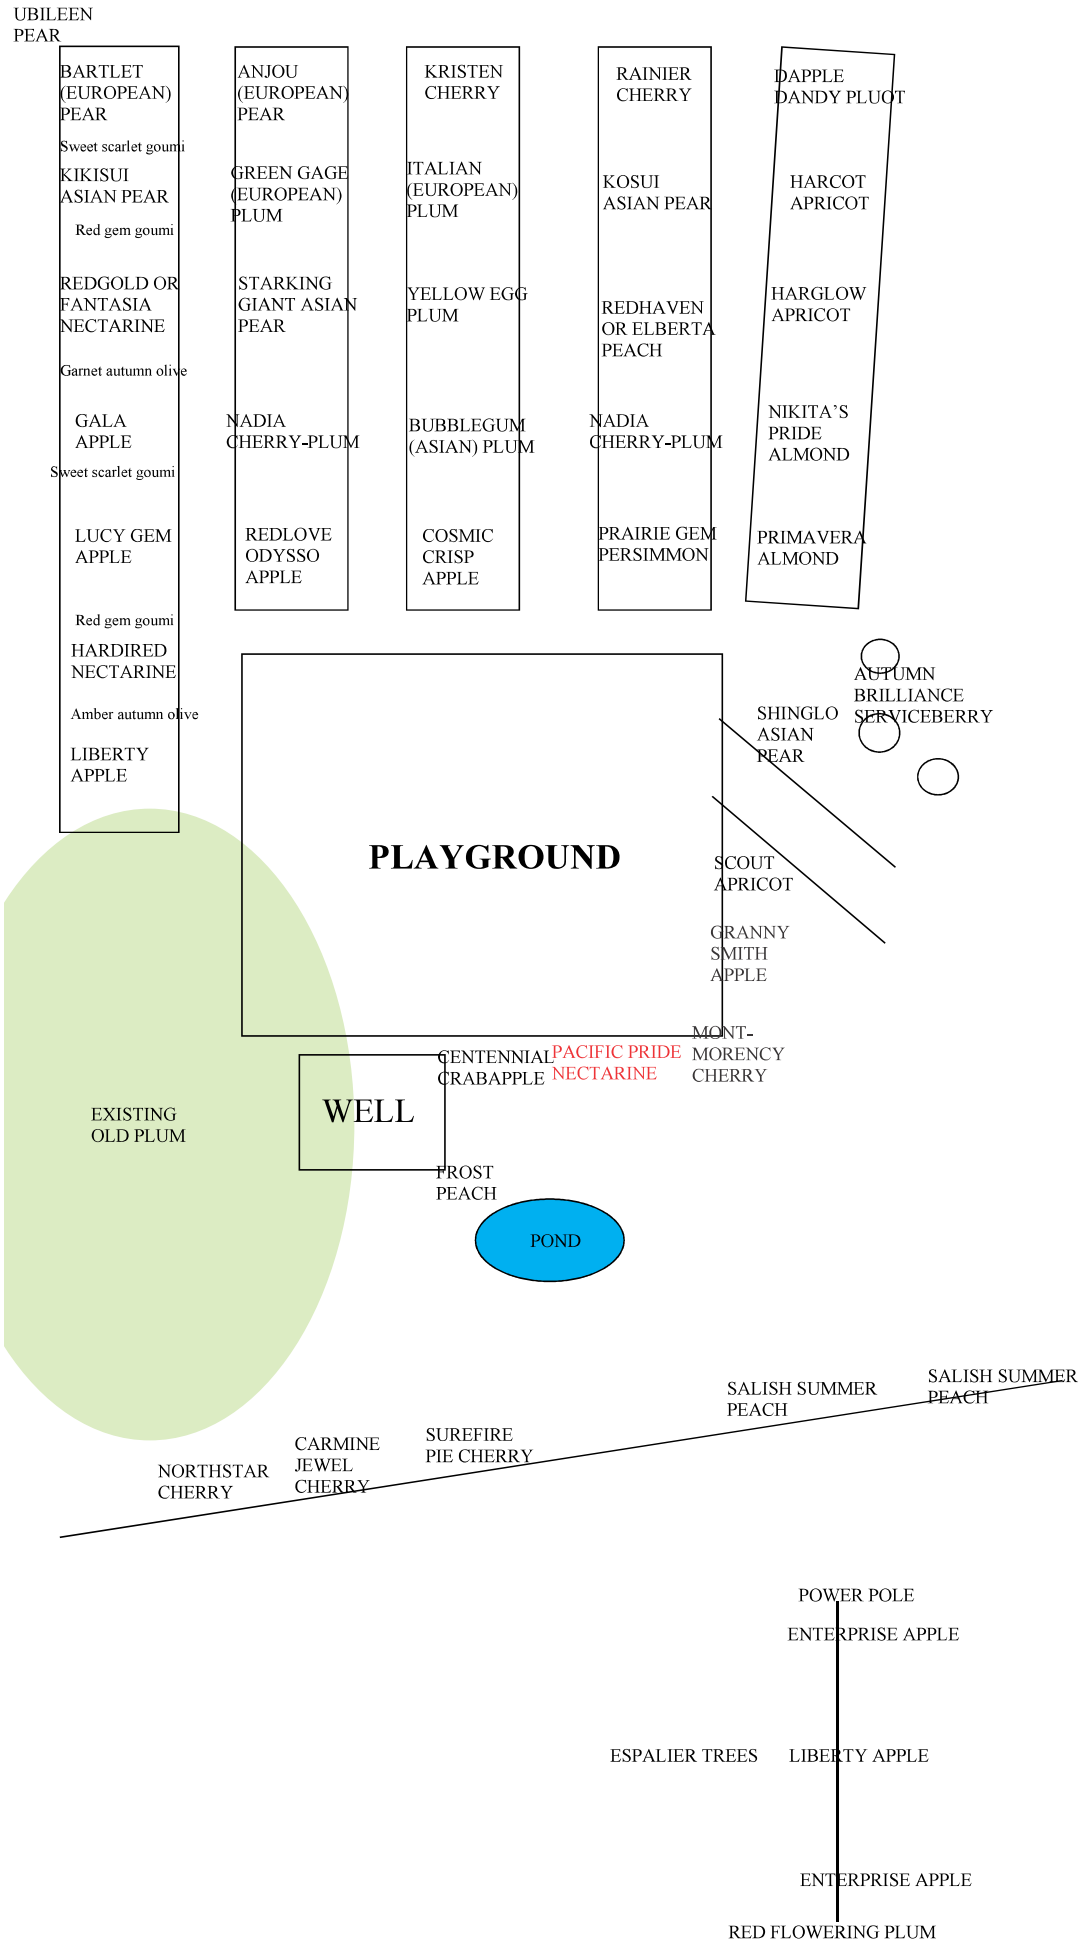

JEFFERSON

- located at the bottom of the row of Ts, second one to west of Theta
- planted potted spring 2023, Pretty Edibles
- complete immunity to EFB, extreme insect resistance
- produces abundant, flavorful nuts
- high quality nuts, few blanks, commercial quality
- cross pollinates with Jefferson
- grows 10-15 ft
- hardy to zone 4, flowers can be damaged at -15
- early fall through winter interest with catkins and flowers
- nuts ripe in September, gather from ground
- bears 2-3 years after planting
- produces 10+ lbs at maturity

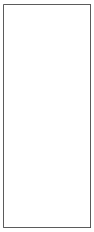

MOUNTAIN ASH

BABY SHIPOVA

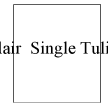

- located to east of greenhouse
- planted potted spring 2023, Pretty Edibles
- *Sorbopyrus auricularis*
- grows 6-8’ tall
- hardy to zone 4
- very early bearing
- sweet, delicious, seedless, yellow-orange fruit with delicate, rose-like aroma and a flavor similar to Asian Pear
- self fertile
- bears 2-3 years after planting
- 20+ lbs fruit at maturity
